2.3 Local Staff

Description of local staff:

The daily work and collaboration of the hospital's local staff have been exemplary. Starting with Dr. Mukalazi, the hospital's director, and all the administrative support staff. Also the pharmacy staff and the entire nursing team, always willing to help, working marathon-length shifts.

Special thanks to:

-Issac and Musa, the two doctors on the team who took part in the surgical procedures and showed enormous interest and ability to learn.

-David, anesthesiologist, worked side by side with our anesthesiologists, always willing to learn new procedures.

-Christine, head nurse, always attentive to all the patients.

-Pius, in charge of sterilization, worked tirelessly to keep the equipment always organized, clean, sterile, and ready to be used again after each procedure.

-Fred, head of the surgical area, always attentive to all our needs.

Overall, the entire hospital staff worked tirelessly to make the campaign a true success.
